

Preslime expts done in 2012

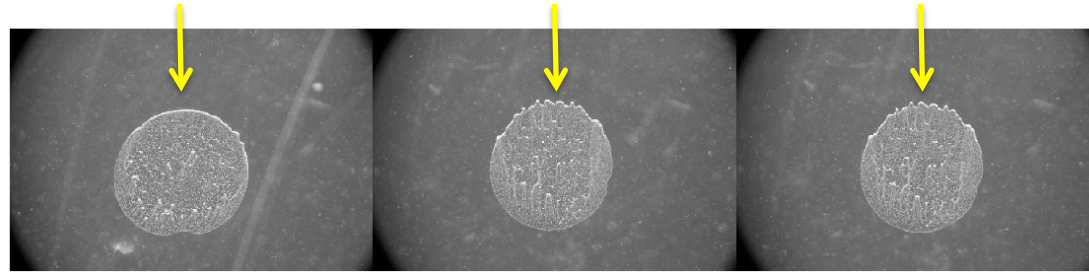

All experiments were done with the following conditions tested:

- Nil (no treatment on agarose)
- BG11 (agarose treated with BG-11)
- 1x (agarose treated with 1x supernatant from culture)
- 0.5x (fresh BG-11 and supernatant mixed in 1:1 ratio)
- 0.25x (fresh BG-11 and supernatant mixed in 3:1 ratio)
